### NOTE:-

These brushes just give an idea about the different types of planetary deburring brushes in our standard ranges. In case if you have a special requirements, we would be pleased to undertake customized orders, so get in touch with your samples - Minimum two components with Burrs and one that you consider acceptably deburred. It should be on a Non-Returnable basis since at times components do go through tests and analysis and get damaged or destroyed. Technical details from your side can help us provide you the results you are looking for.
